

WHAT IS CLAIMED IS:

1. A cigarette filter, comprising: filter  
sections including filter materials individually  
wrapped with plug wrap paper; forming paper for  
5 wrapping the filter sections integrally; and tipping  
paper covering the forming paper so as to connect the  
filter sections to a cigarette section to form a  
cigarette,

wherein activated charcoal and silica/alumina are  
10 contained as adsorbents in at least one of the filter  
materials and a space between the filter materials.

2. The cigarette filter according to claim 1,  
wherein the plug wrap paper or the forming paper  
contains the activated charcoal and the silica/alumina  
15 as the adsorbents.

3. The cigarette filter according to claim 1,  
wherein two filter materials are provided, and a  
mixture of the activated charcoal and the  
silica/alumina is loaded in the space between the two  
20 filter materials.

4. The cigarette filter according to claim 1,  
wherein two filter materials are provided, and a  
mixture of the activated charcoal and the  
silica/alumina is dispersed in one of the filter  
25 materials.

5. The cigarette filter according to claim 1,  
wherein three filter materials are provided, and the

activated charcoal and the silica/alumina are individually loaded in the two spaces between the three filter materials.

5       6. The cigarette filter according to claim 1, wherein three filter materials are provided, and the activated charcoal is dispersed in one filter material and the silica/alumina is dispersed in another filter material.

10       7. A cigarette filter, comprising a cigarette holder body including filter materials arranged therein, wherein activated charcoal and silica/alumina are contained as adsorbents in at least one of the filter materials and a space between the filter materials.
